Pedagogic Innovations

- 2023 Experimental implementation of [Packback platform](#), for use by students on a voluntary basis, in two online electives in Spring 2023. This platform's AI not only detects plagiarism and GPTChat in essays, but also gives students valuable writing tips, shows them how to quote and cite sources correctly, and checks their grammar and spelling. Appears to be a state-of-the-art medium for courses requiring substantive writing.
- 2020-21 Organization, administration and teaching of "Super-Jumbo" PHIL 10200, delivered online to hundreds of students during the COVID-19 pandemic. Duties included Monday plenary lectures, supervision of seven Adjunct lecturers leading multiple breakout sessions, and teaching a jumbo section of eighty students. This "Super-Jumbo" was developed in collaboration with the Dean of Humanities and the Chair of Philosophy.
- 2016-17 Organization and teaching of Certification courses in Philosophical Practice, for two visiting cohorts of undergraduate students and one visiting cohort of graduate students from Kyungpook National University, funded by the South Korean government. Registration and certification were coordinated with CCNY's Office of Continuing and Professional Studies, and the Division of Humanities & the Arts.
- 2000-05 Designed and taught half-day workshops on ethical decision-making for elected State legislators, County executives, and other senior public and civil servants at the University of Arizona's Institute for Local Government, as a component of their annual Southwest Leadership and Governance certification program.
- 2000-... Designing and teaching workshops on ethics and values for global leadership communities including Horasis and the World Economic Forum, not only for current business and cultural leaders but also for young global leaders, entrepreneurs and social entrepreneurs.
- 1999-... Designing and teaching of certification seminars in Philosophical Practice (Client Counseling, Group Facilitation, and Organizational Consulting) under the aegis of the American Philosophical Practitioners Association. Since 1999 APPA has trained and certified more than 500 philosophers from USA and abroad to render professional services beyond the academy.
- 1994-... Designing and teaching of new courses in Philosophy at The City College. Thus far, the following courses were introduced to the curriculum: the Applied Ethics stream (Biomedical Ethics, Business Ethics, Computer Ethics, Engineering Ethics, Environmental Ethics), the Asian Philosophy cycle (Buddhism, Chinese Philosophy, Indian Philosophy), as well as Decision Theory, Philosophy of Artificial Intelligence, and Philosophy of Science Fiction.
